SW Salmon Science Workshop - Final Agenda.pdf

FYI – just found out about this yesterday. Mike W is speaking this morning on his dissertation research. Additional talks by folks we know.

Yesterday's speakers addressed copper water quality standards.

Attached is the agenda, but without the abstracts I saw today in print. I think that all the people who talked today were on this panel.

Thanks Mike! I'd be interested, and I'm sure Glenn and others would be as well. I mentioned it to Glenn and he was curious who was on the copper panel.

I don't think the panel discussion is being recorded.

Actually I left before that began to take Dave Montgomery back to the airport.

There is a meeting handout with some abstracts. I'll send that along.

Do you know if panel on copper will be videotaped or otherwise available via web? I couldn't find anything at the Salmon Habitat Partnership website.
